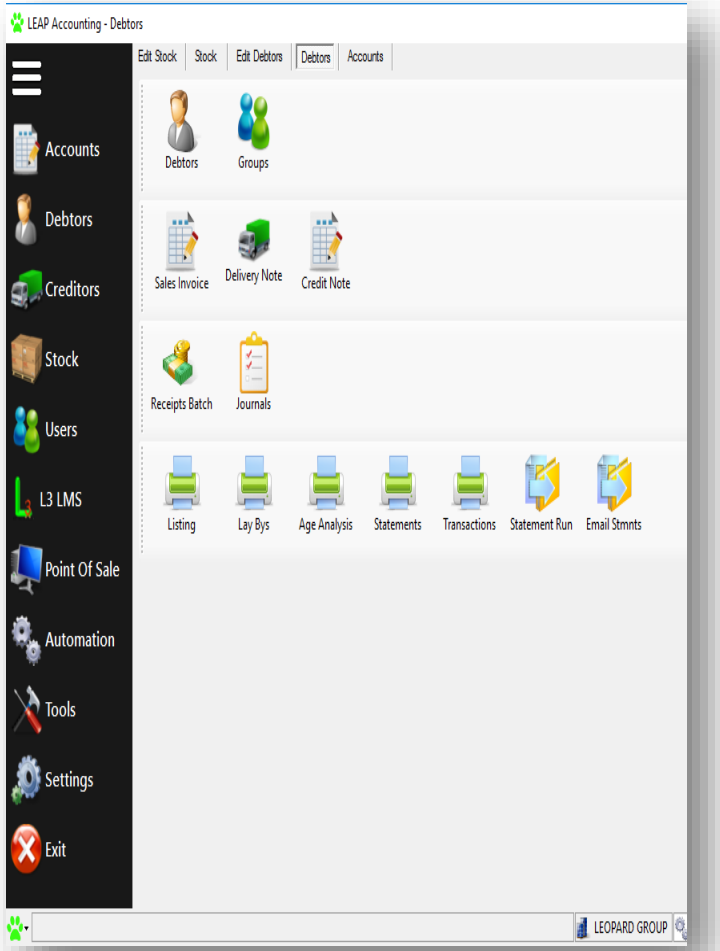
2. LEAP ACCOUNTING

2.1. WHY CONSIDER AN ALL IN ONE SYSTEM

- Leap Accounting is a complete accounting system to complete all accounting transactions
- L3 can be Found within its LEAP ACCOUNTING OR SAGE
- No need to open different applications each time
- Once a student is captured that is the registration and no need to duplicate into 2 systems
- If a transaction is deleted in L3 it is automatically deleted in LEAP or SAGE. No need for duplications.
- Keeps to the rules of Basic Accounting Practices for e.g. one invoice to one debtor restricting processing to the correct GL accounts / account types / accurate allocations of cash book transactions. (EFTs, credits, cash payments etc.)
- This has been seen at multiple education institutes where a single invoice has been raised but linked to multiple debtor accounts thus creating data corruption.
- LEAP or Sage provides tools to keep tabs on user activities, printing transactions, and any bank payments to eliminate fraud.
- It simplifies the relationship between the student and institute by maintaining the student as a debtor, registrations as an invoice.
- With our system we don't un-post or delete transactions but rather credit and re-invoice and use a hide from statement flag. This ensures that your sequence of numbers are retained for audit process.
- It provides tools that reduces the turnaround time required to produce the annual financial statements.



2. LEAP ACCOUNTING

2.2. WHAT IS LEAP ACCOUNTING?

- Cost effective financial system which manages and records the day-to-day financial transactions of an organization.
- Leap Accounting allows you to keep track of expenses, income, and other activities
- Automatically generates billing for rendered services and products.
- These invoices are commonly created using ready-made templates, mostly professional-looking ones, which makes the process easier and advantageous to businesses.
- An invoice is a bill sent to a customer before or after they have already received a product or service. If a customer purchases something without paying immediately, you will send an invoice. An invoice sent to a customer is known as a sales invoice. You might also receive invoices from your vendors
- Multiples users
- Works in all types of businesses

2. LEAP ACCOUNTING

2.3. LEAP ACCOUNTING - PORTAL

- Allows for the following Portal to capture all aspects
- Accounts
- Debtors /Creditors
- Stock
- Users
- Point of sale should you have a tuck shop or canteen (we offer POS software and hardware machines at an additional cost)

2. LEAP ACCOUNTING

2.3.7. AGE ANALYSIS

- Age analysis is simply a time-based analysis with reference to due date to determine either how much time is left until due date or how much time has passed since due date.
- Aging is a method used by accountants and investors to evaluate and identify any irregularities within a company's accounts receivables (ARs).
- Outstanding customer invoices and credit memos are categorized by date ranges, typically of 30 days, to determine how long a bill has gone unpaid.
- A listing of debtors' accounts (i.e. the amounts owing to a business), usually produced monthly, which analyses the age of the debts by splitting them into such categories as those up to one month old, two months old, and more than two months old.
- With our system it's as easy as clicking on the Age Analysis button and choosing the time period.
- Please note certain details have been blocked due to the Popi Act
  - **Step one**: click on the Age Analysis feature
  - **Step two**: Select from which Customer to which customer you would like to run the Age Analysis report.
  - **Step Three**: the Report is produced and you have an option to print to PDF (example on next page…)

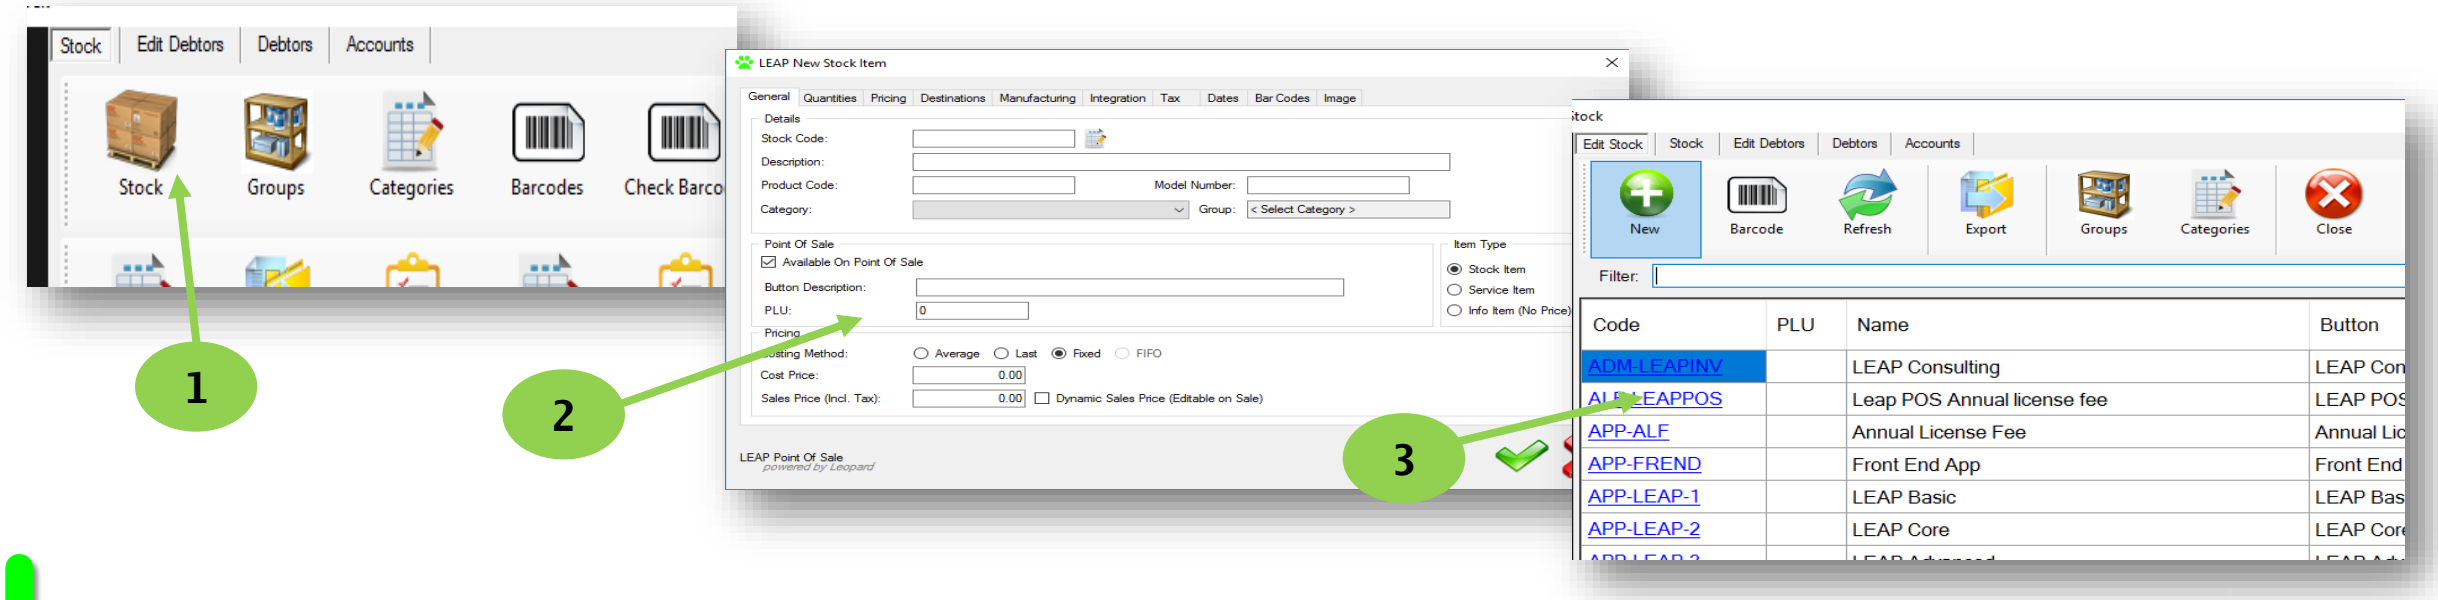
2.3.8. STOCK - CAPTURING OF STOCK

1. STEP ONE -Entering Stock on the system - Click on the Stock icon
2. STEP TWO - new screen to add stock
3. STEP THREE - Screenshot of stock sheet / page to create new group / categories / new items



L3 EDUCATION SOLUTIONS – LEAP ACCOUNTING

2.3.9. FIXED ASSETS AND SECURITY SOFTWARE SERVICES

- L3 tracks fixed assets to their relative condition, asset value and depreciation. Maintains a register that is GRAP (Generally Recognized Accounting Practice) compliant.
- System Makes use of Bar Code Scanners for ease of use and more accurate tracking.
- SECURITY SOFTWARE SERVICE
  - Our solution incorporates security tools to manage EDUCATION FACILITIES security gateways or gates for incoming and outgoing stock and fixed assets movements. (Refer to GateX software on our company profile https://leopardgroup.org.za)
  - For e.g. a number of touch screen notebooks ordered at an institution and the delivery service delivered however the person who was in charge of collecting had no recollection. By having GateX system the order cannot be collected or dispatched without confirmation.
  - GateX allows for both parties to have a copy of the delivery and acceptance on a digital service. Necessary parties at the institute are alerted of delivery. This avoids loss of assets at the gate and both parties can account for the collection and delivery.
- And many other features

L3 EDUCATION SOLUTIONS – LEAP ACCOUNTING

2.4. EASY MANAGEMENT SERVICES

- L3 provides ongoing contract and service level agreement management which includes contracts being signed digitally and maintained within the system. Services incorporates technologies and software tools to ensure the college policies are in line with the governments "Go green" policy to reduce the Institute's carbon footprint. Reduces the loss of documentation, duplications and fraudulent copies. (Please refer to the DigiCo software on on our company website https://leopardgroup.org.za).
- Our solution uses a well routed, stable and affordable accounting solutions
- Our solution provides tools to management to make on the fly fixes to data without the need of costly consultant fees. These amendments will eliminate any misstatements made prior to the compilation of the AFS thus reducing any corrections to be made by the auditors. Inevitable reducing costs and the risk of qualifications. (Please refer to the Coherent software on our company website https://leopardgroup.org.za)
- Our solution provides internal controls over transactions and the preparation of financial statements by use of Authorizations by the proper authorities within the institute.
  - For e.g. Procurement have mistakenly made multiple payments to suppliers for the same invoice.
  - Incorrect bank accounts have been used for payments (some cases fraudulent)
  - Cases were private purchases have been made because of the lack of authorizations.
- Payments made to suppliers without the invoice being fulfilled or service or goods been provided
- And many more…

2.5. TRANSACTIONS

- L3 provides a means of tracking and reducing duplications of transactions, documents, creditors and debtors payments. This includes the tracking of printed documents. (use of our Software application PAMs – Print Audit Monitor Software on our company website https://leopardgroup.org.za)
    - Example it has been seen at multiple Education facilities where multiple payments have been made to a singular bank account.
    - Students have been registered more than once and have been receiving payments for both registrations.
    - Members were found to be collecting all funds on behalf of the students but not channeling the funds to the respective students.
- With the use of PAMs (view on our company website https://leopardgroup.org.za)
    - You will be able to audit all documents that are printed (digitally or physical) and by which user.
    - Combination of a service and triggers, to monitor the printing of documents
    - Log which user printed or reprinted a document
    - GUI to view the log, with a few search tools.
- And many more other software features and options Leopard can provide an institution to eliminate theft.

2.6. BENEFITS OF LEAP ACCOUNTING

- Works directly within LEAP ACCOUNTING / SAGE (ONE DATABASE)
- Single Database - works directly on a LEAP / Sage Evolution Database, hence no duplication or misrepresentation of transactions nor additional integrations.
- Cost Effective, Easy Installation, Offline Solution
- On-The-Fly Stock Addition - Should a stock item not exist, the system can be configured to allow the creation of stock on the fly. This allows the owner to create an extensive stock list, from the get go.
- Electronic Till printing - Can be saved as a PDF or printed or emailed
- Dynamic Pricing and Quantities - Allows for the edit of Price on any specific items. Prices captured for specific Service Types. Specials. Limited Time Offer. Minimum Quantities (stop Sale, as item might be required for a combo or manufacturing of another item).
- Auto Re-Order with level and default quantity to be ordered from specific preferred supplier (Auto-Email)
- Multiple Service Types - Counter Sales, Deliver, Part Delivery, Pick-Up, Stokvel, Lay By etc..
- Allows Negative Stock - Product Code and Model Number lookups, with Similar product lookups. Average, Last, Fixed and FIFO Costing Methods. Tax. Barcodes - Dynamic and Static - Packs and Break Downs. Groups and Categories
- And Many more…

L3 EDUCATION SOLUTIONS – LEAP ACCOUNTING
